Project Manager

Job Posting Date:04/8/2022

Categories: Engineering/Project Management

Schedule: Full Time, immediate opening

Location: Cheyenne, WY

EPC uses its industry leading hydrogen experience to design, permit, fabricate and manage field construction of all types of hydrogen systems. These include hydrogen production, storage and distribution systems, fuel cells systems for residential, industrial, or commercial developments, hydrogen transport trailers and pipelines for safe distribution and even emerging technical offerings like containerized ammonia production systems. We are a rapidly growing small business. If you are interested in participating in the renewable revolution join our growing team and help build the future of energy now!

Responsibilities:

- Manage multi-disciplined engineering teams
- Provide technical guidance on all aspects of projects and proposed plans
- Work with Project Management team to coordinate scope and strategy including writing Project Management Plans, WBS, Earned value reporting, QA/QC Plans, budgets, and schedules
- Prepare project designs and reports related to hydrogen infrastructure projects
- Participate in client interaction as technical expert and help to strengthen client relationships
- May be asked to act as the sealing Engineer of Record.
- Work with technical staff in the preparation of construction/fabrication drawings
- Occasional field work and travel.

Requirements:

- Must have a BS or MS in Electrical/Controls or Civil/Structural Engineering from accredited university
- Minimum 5+ years of experience in power or petrochemical industries
- Must be a registered Professional Engineer
- Must have demonstrated skills as a Project Manager
- Excellent written and verbal communication skills.
- Have a strong proficiency with Microsoft Office and CAD products
- Candidate must be highly motivated, possess strong organizational and time management skills, and excel in a multidiscipline project team environment.
- Candidate must be able to respond effectively to inquiries from clients and regulatory agencies.

Other Qualifications:

- Hydrogen industry experience
- US citizen
